# Our Vision & Mission

## Why This Website?

- The growing importance of online presence for restaurants
- The need for easy-to-use, efficient, and visually appealing platforms
- Our goal: Enhance customer experience and restaurant management

## Who Benefits from This?

- Restaurant owners looking for better management
- Customers seeking convenience and customization
- VIP clients enjoying exclusive services

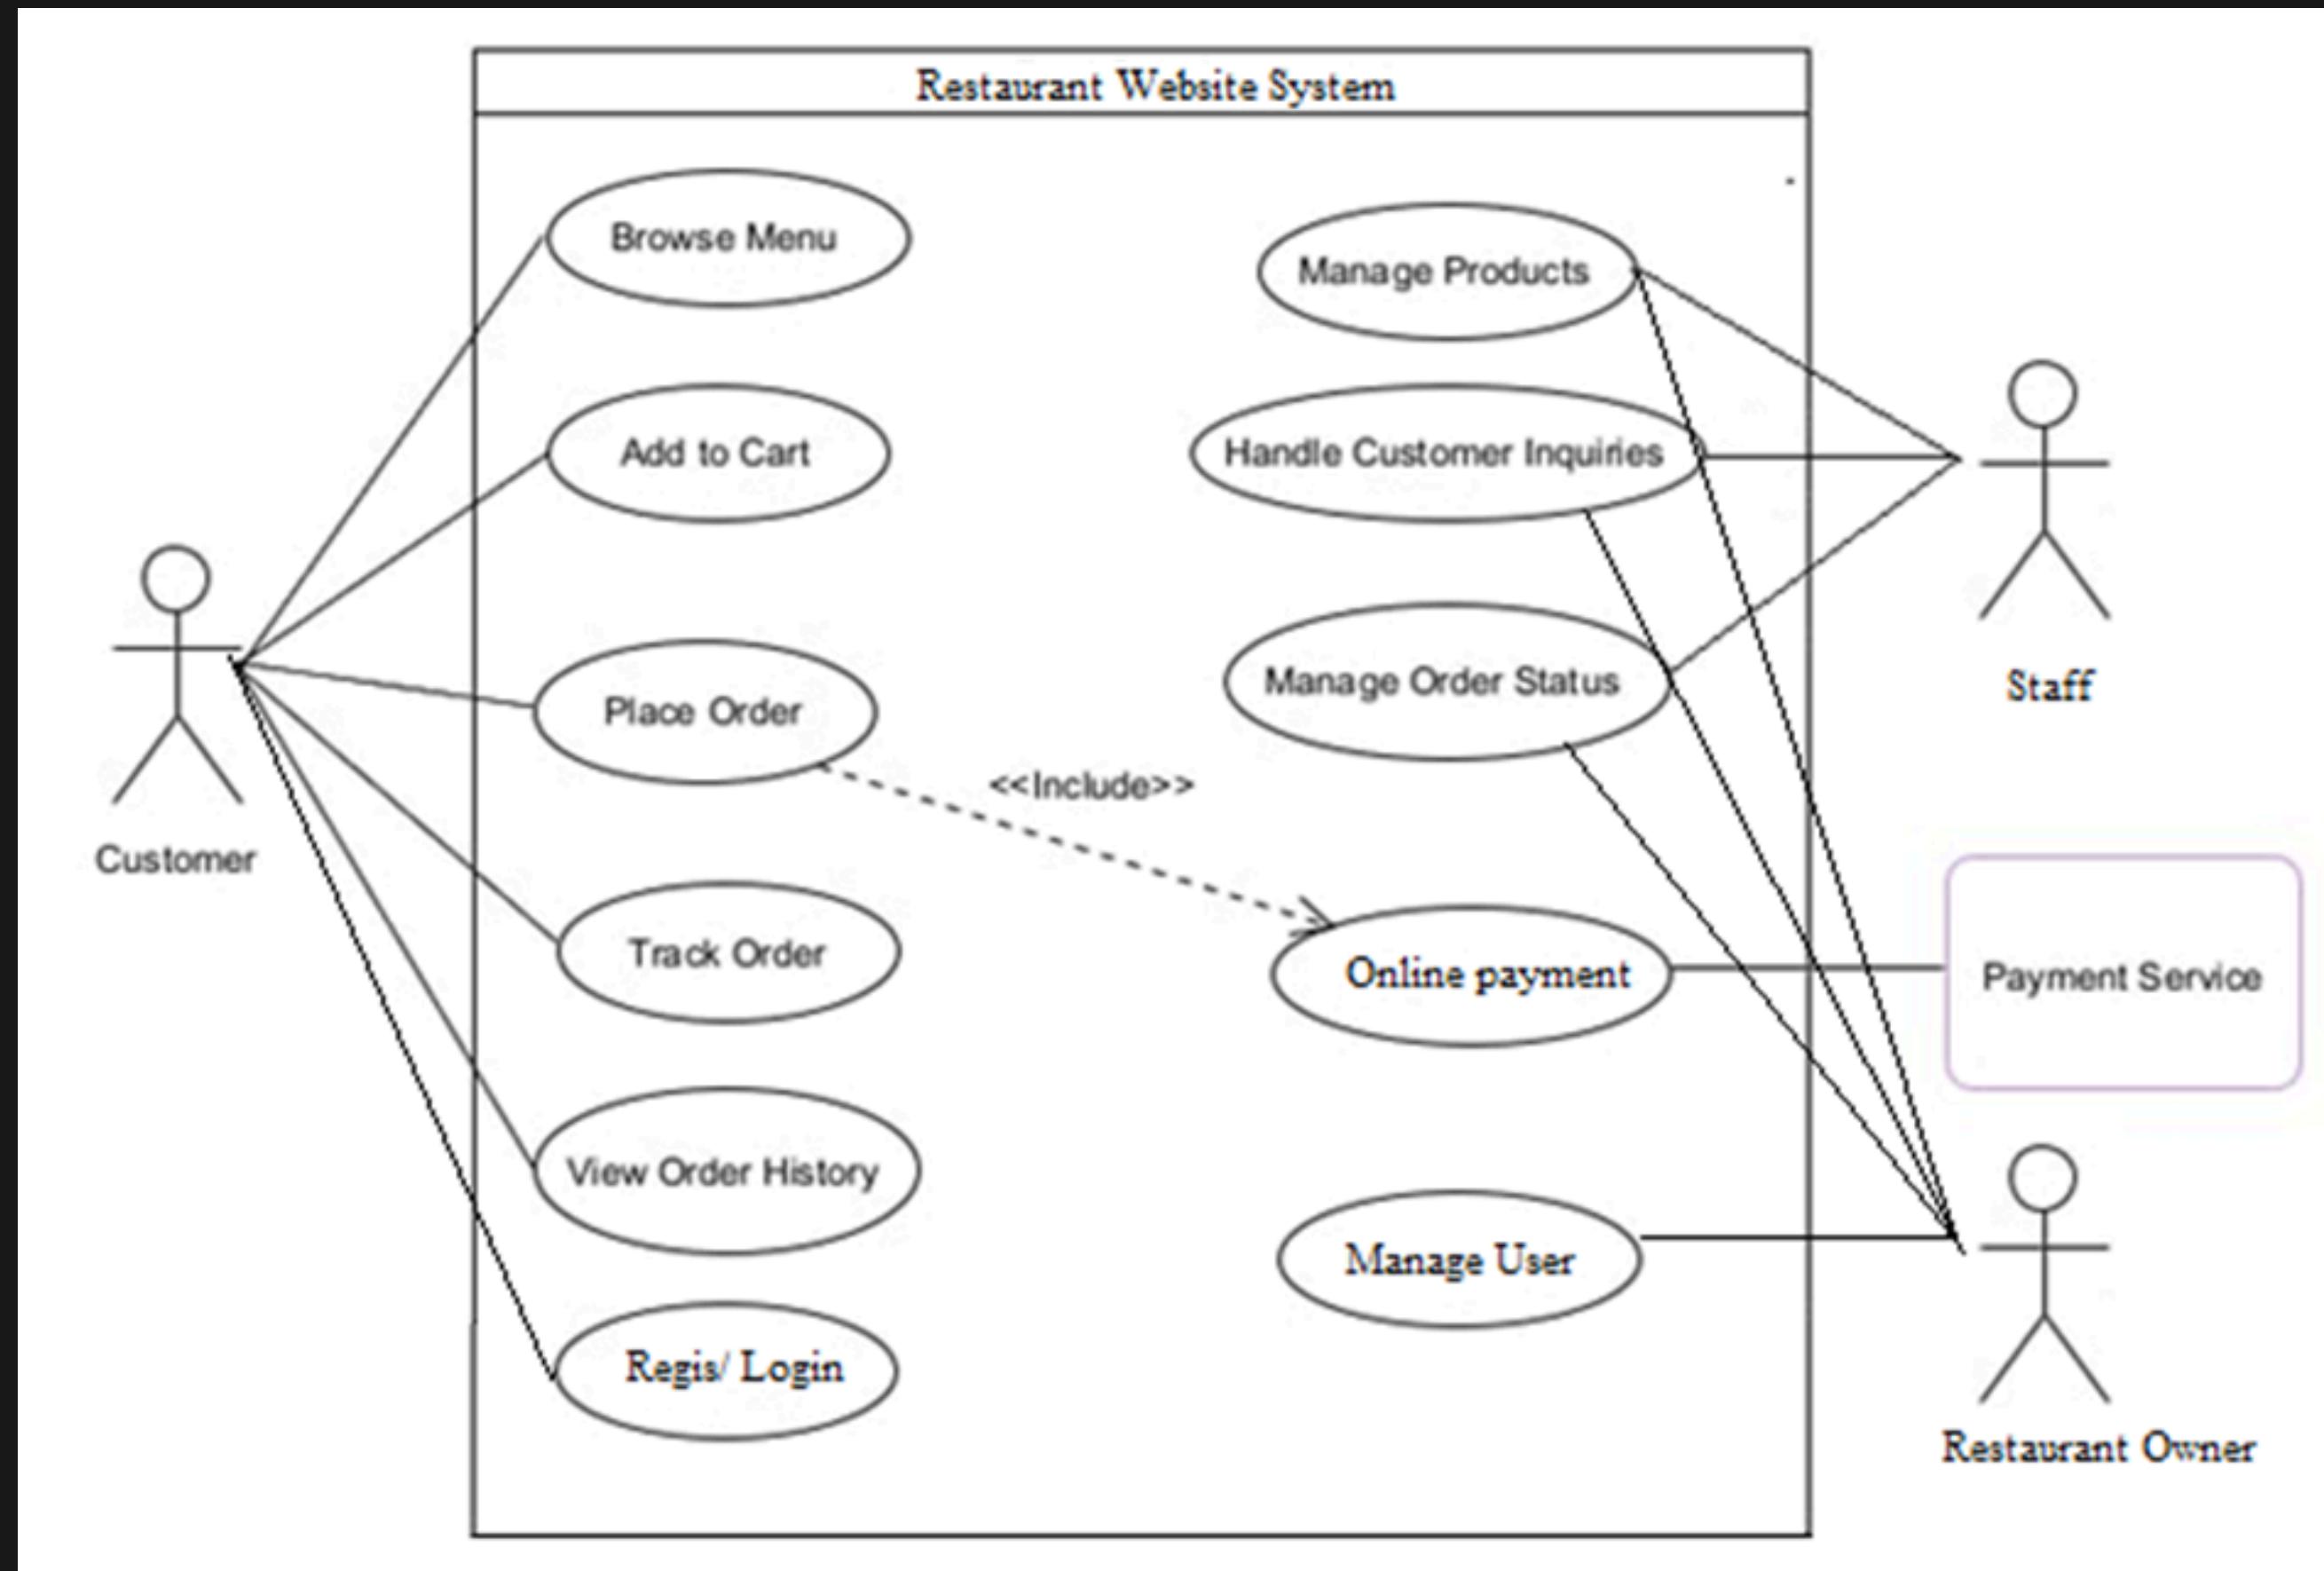

# Key Feature of TTT

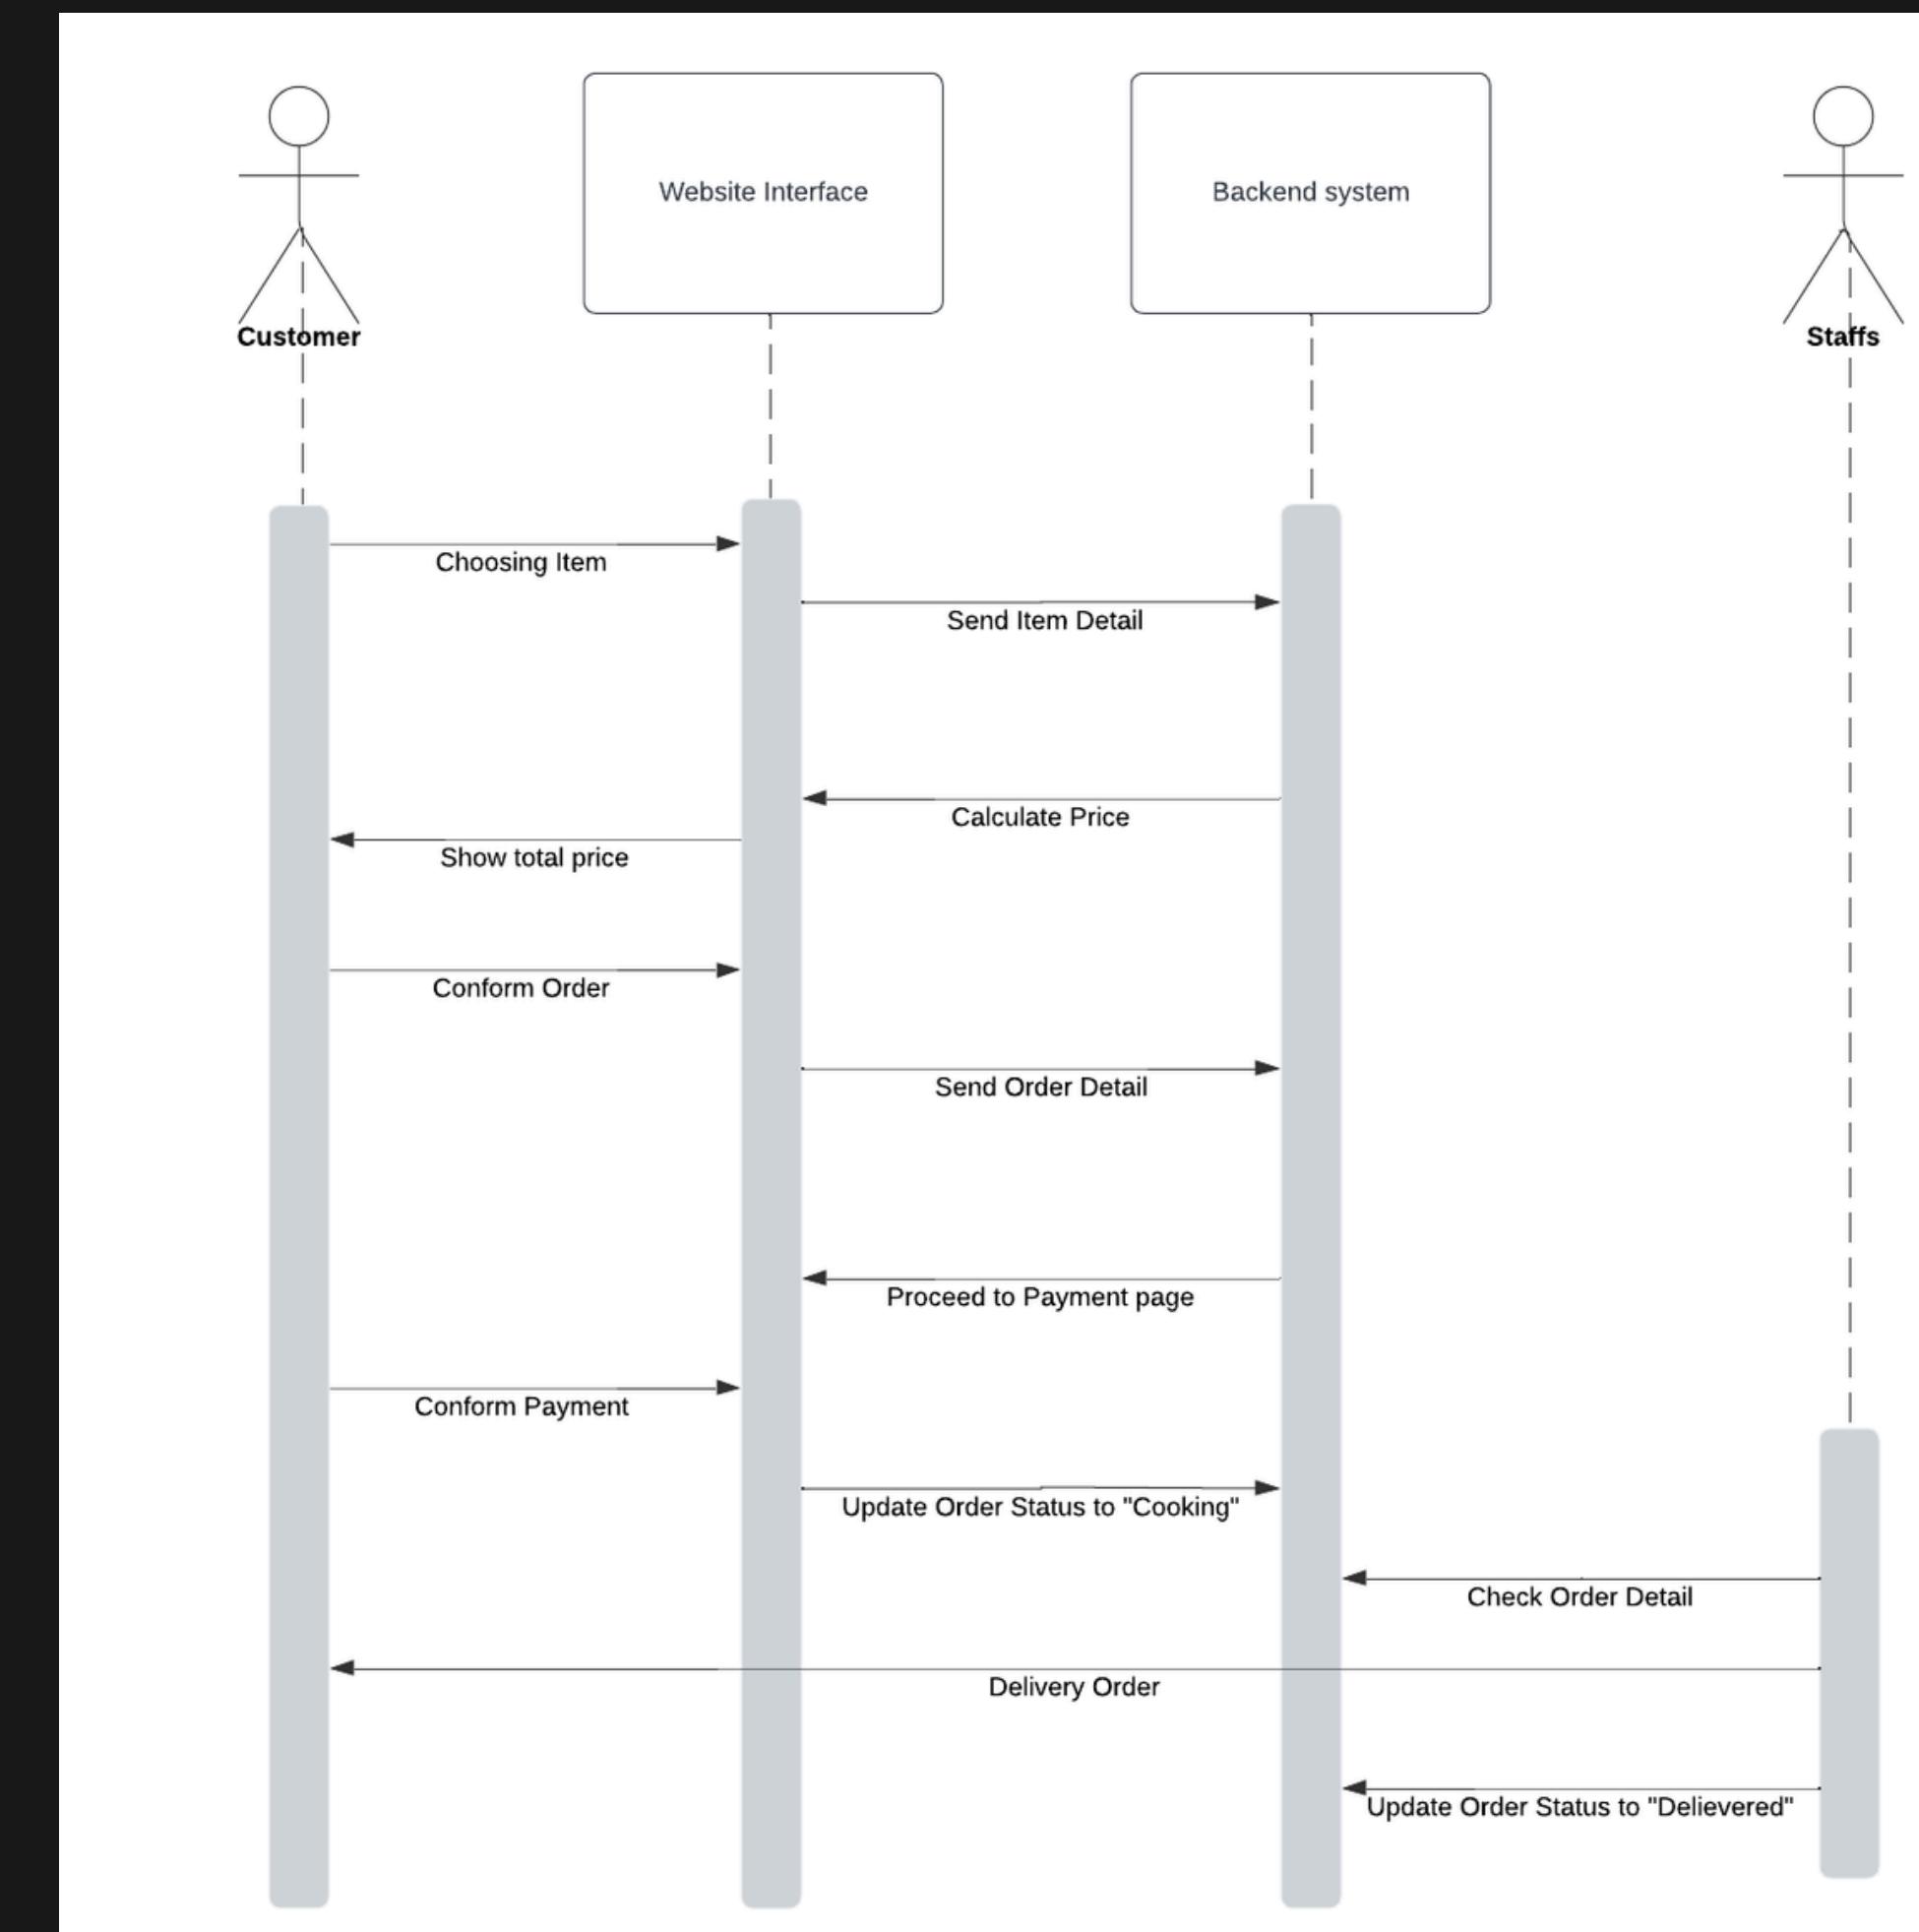

## Functional Requirement

- Login / Register
- Account Management
- Browsing Products
- Ordering Process
- Payment Integration
- Order Tracking:

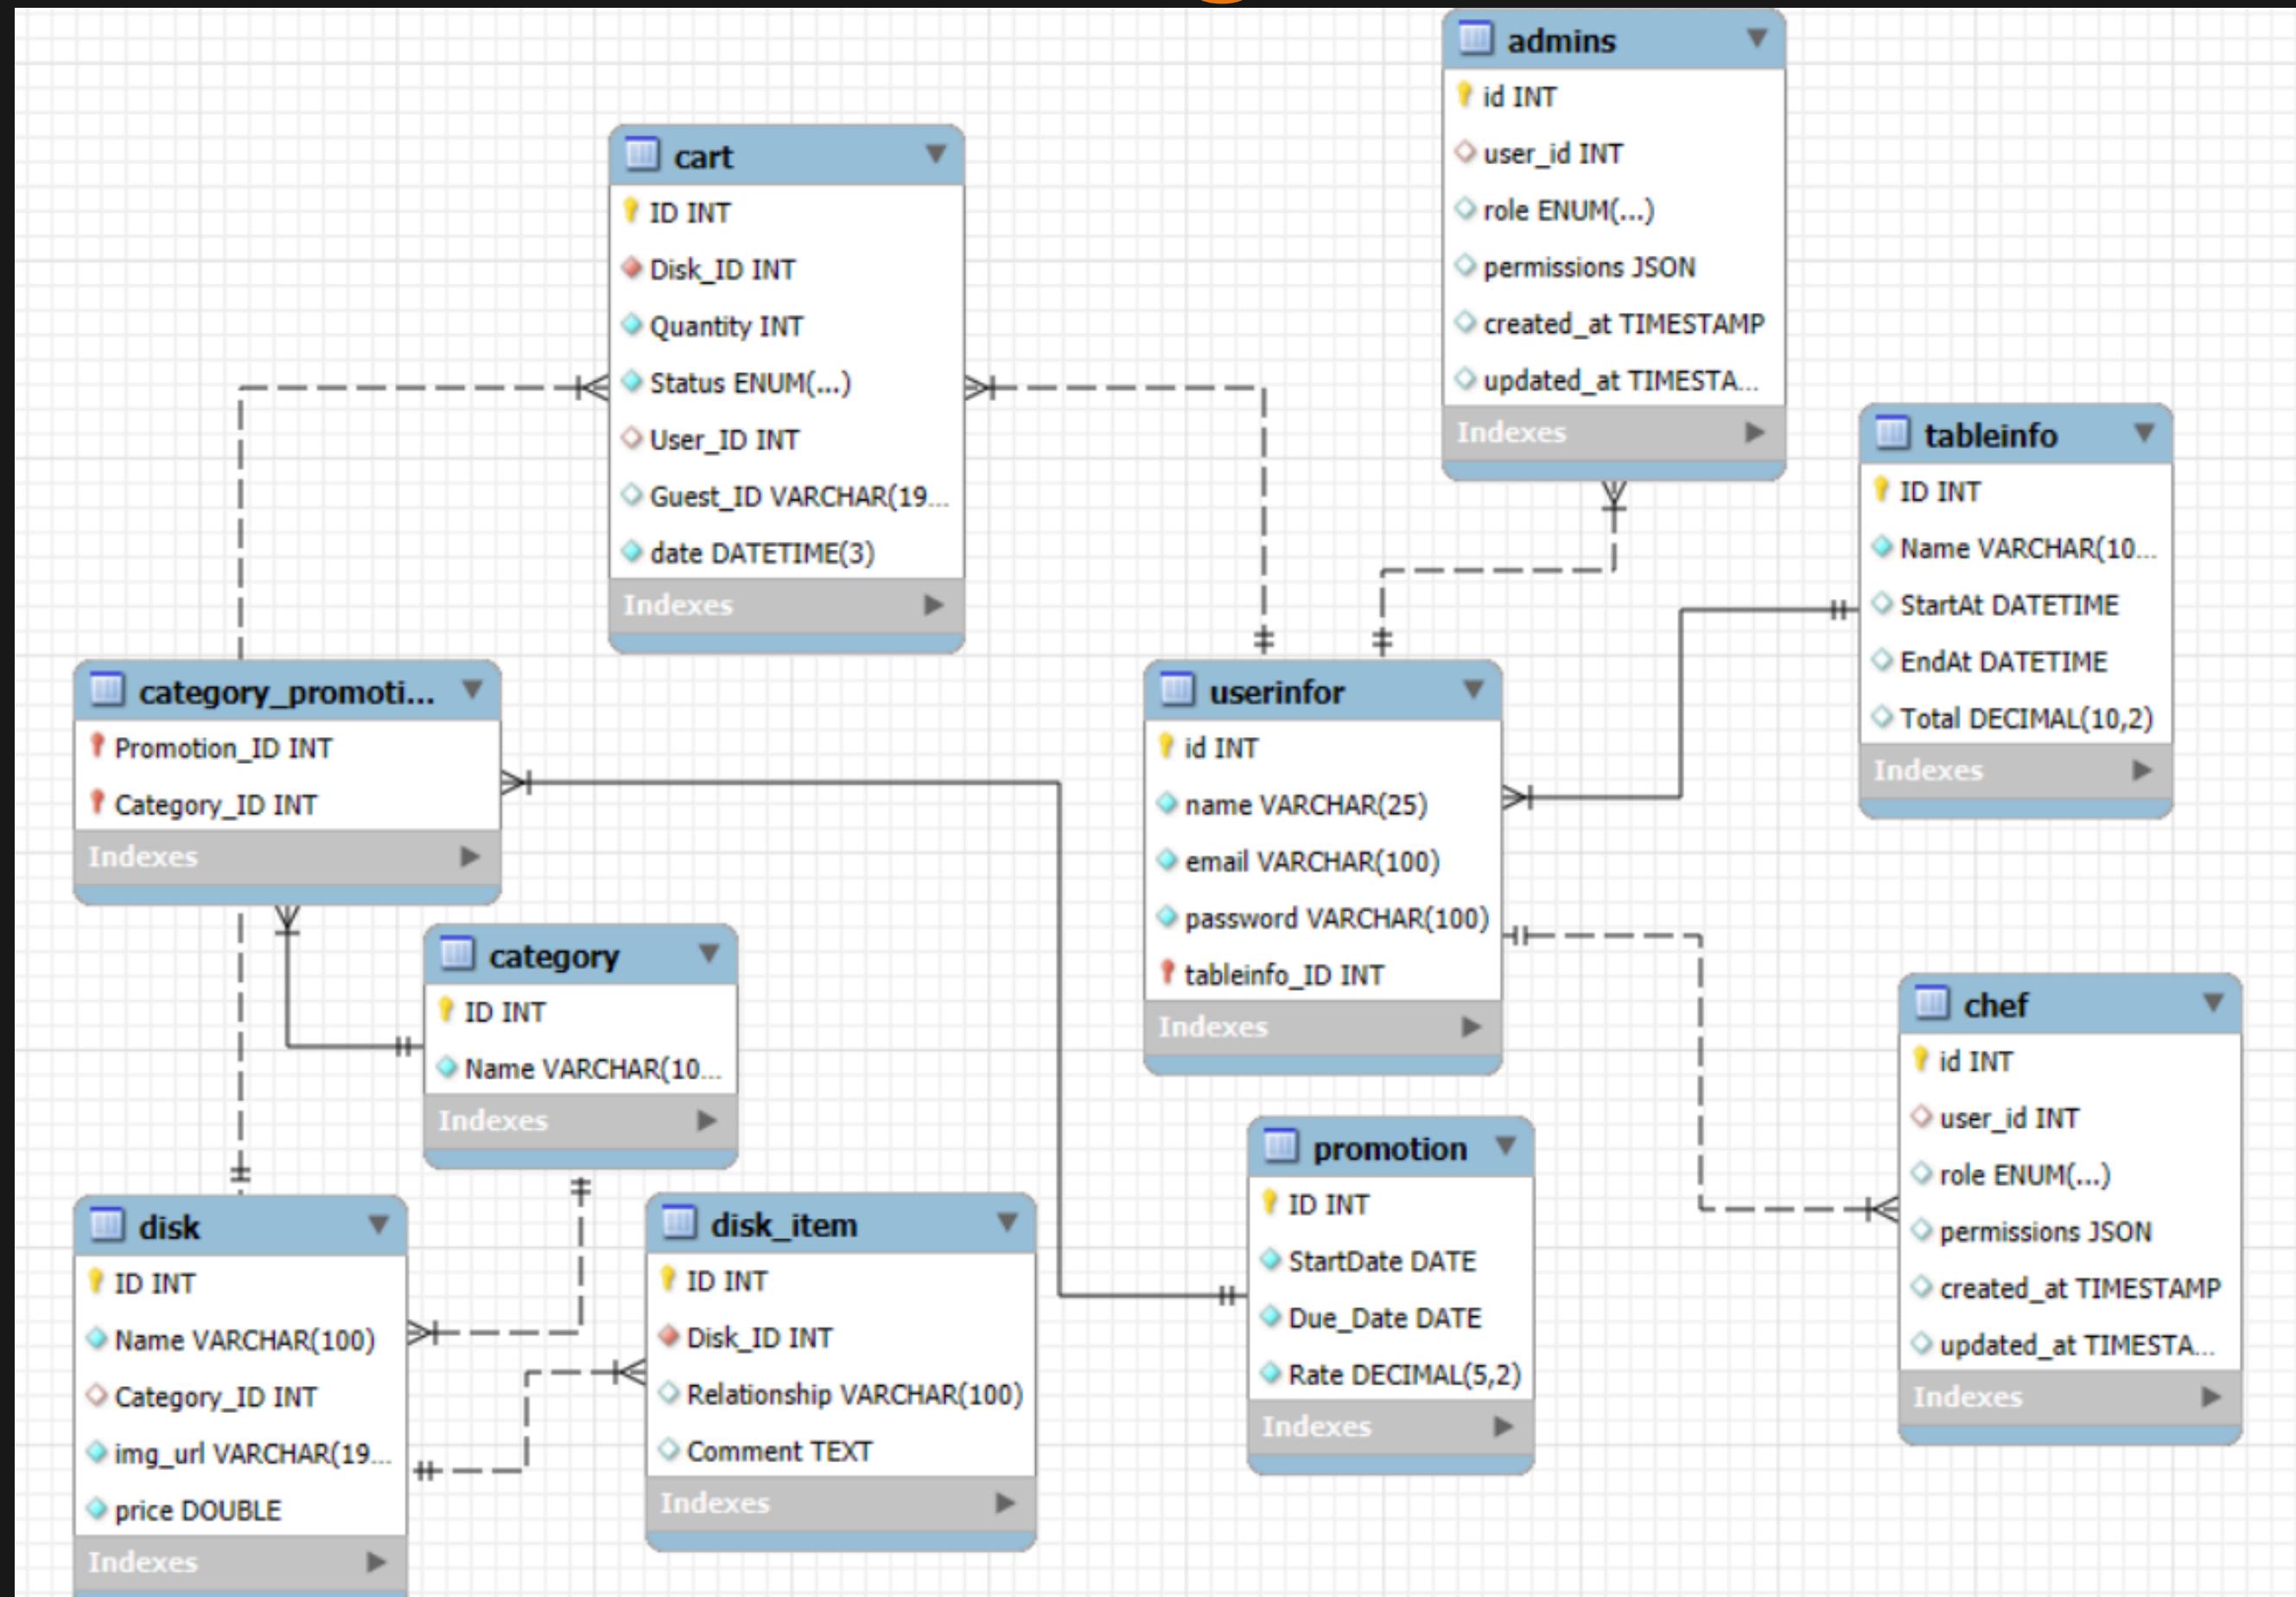

# Use case Diagram

# Sequence Diagram of Process Order

# Entity Relationship Diagram

# User-Centered Design

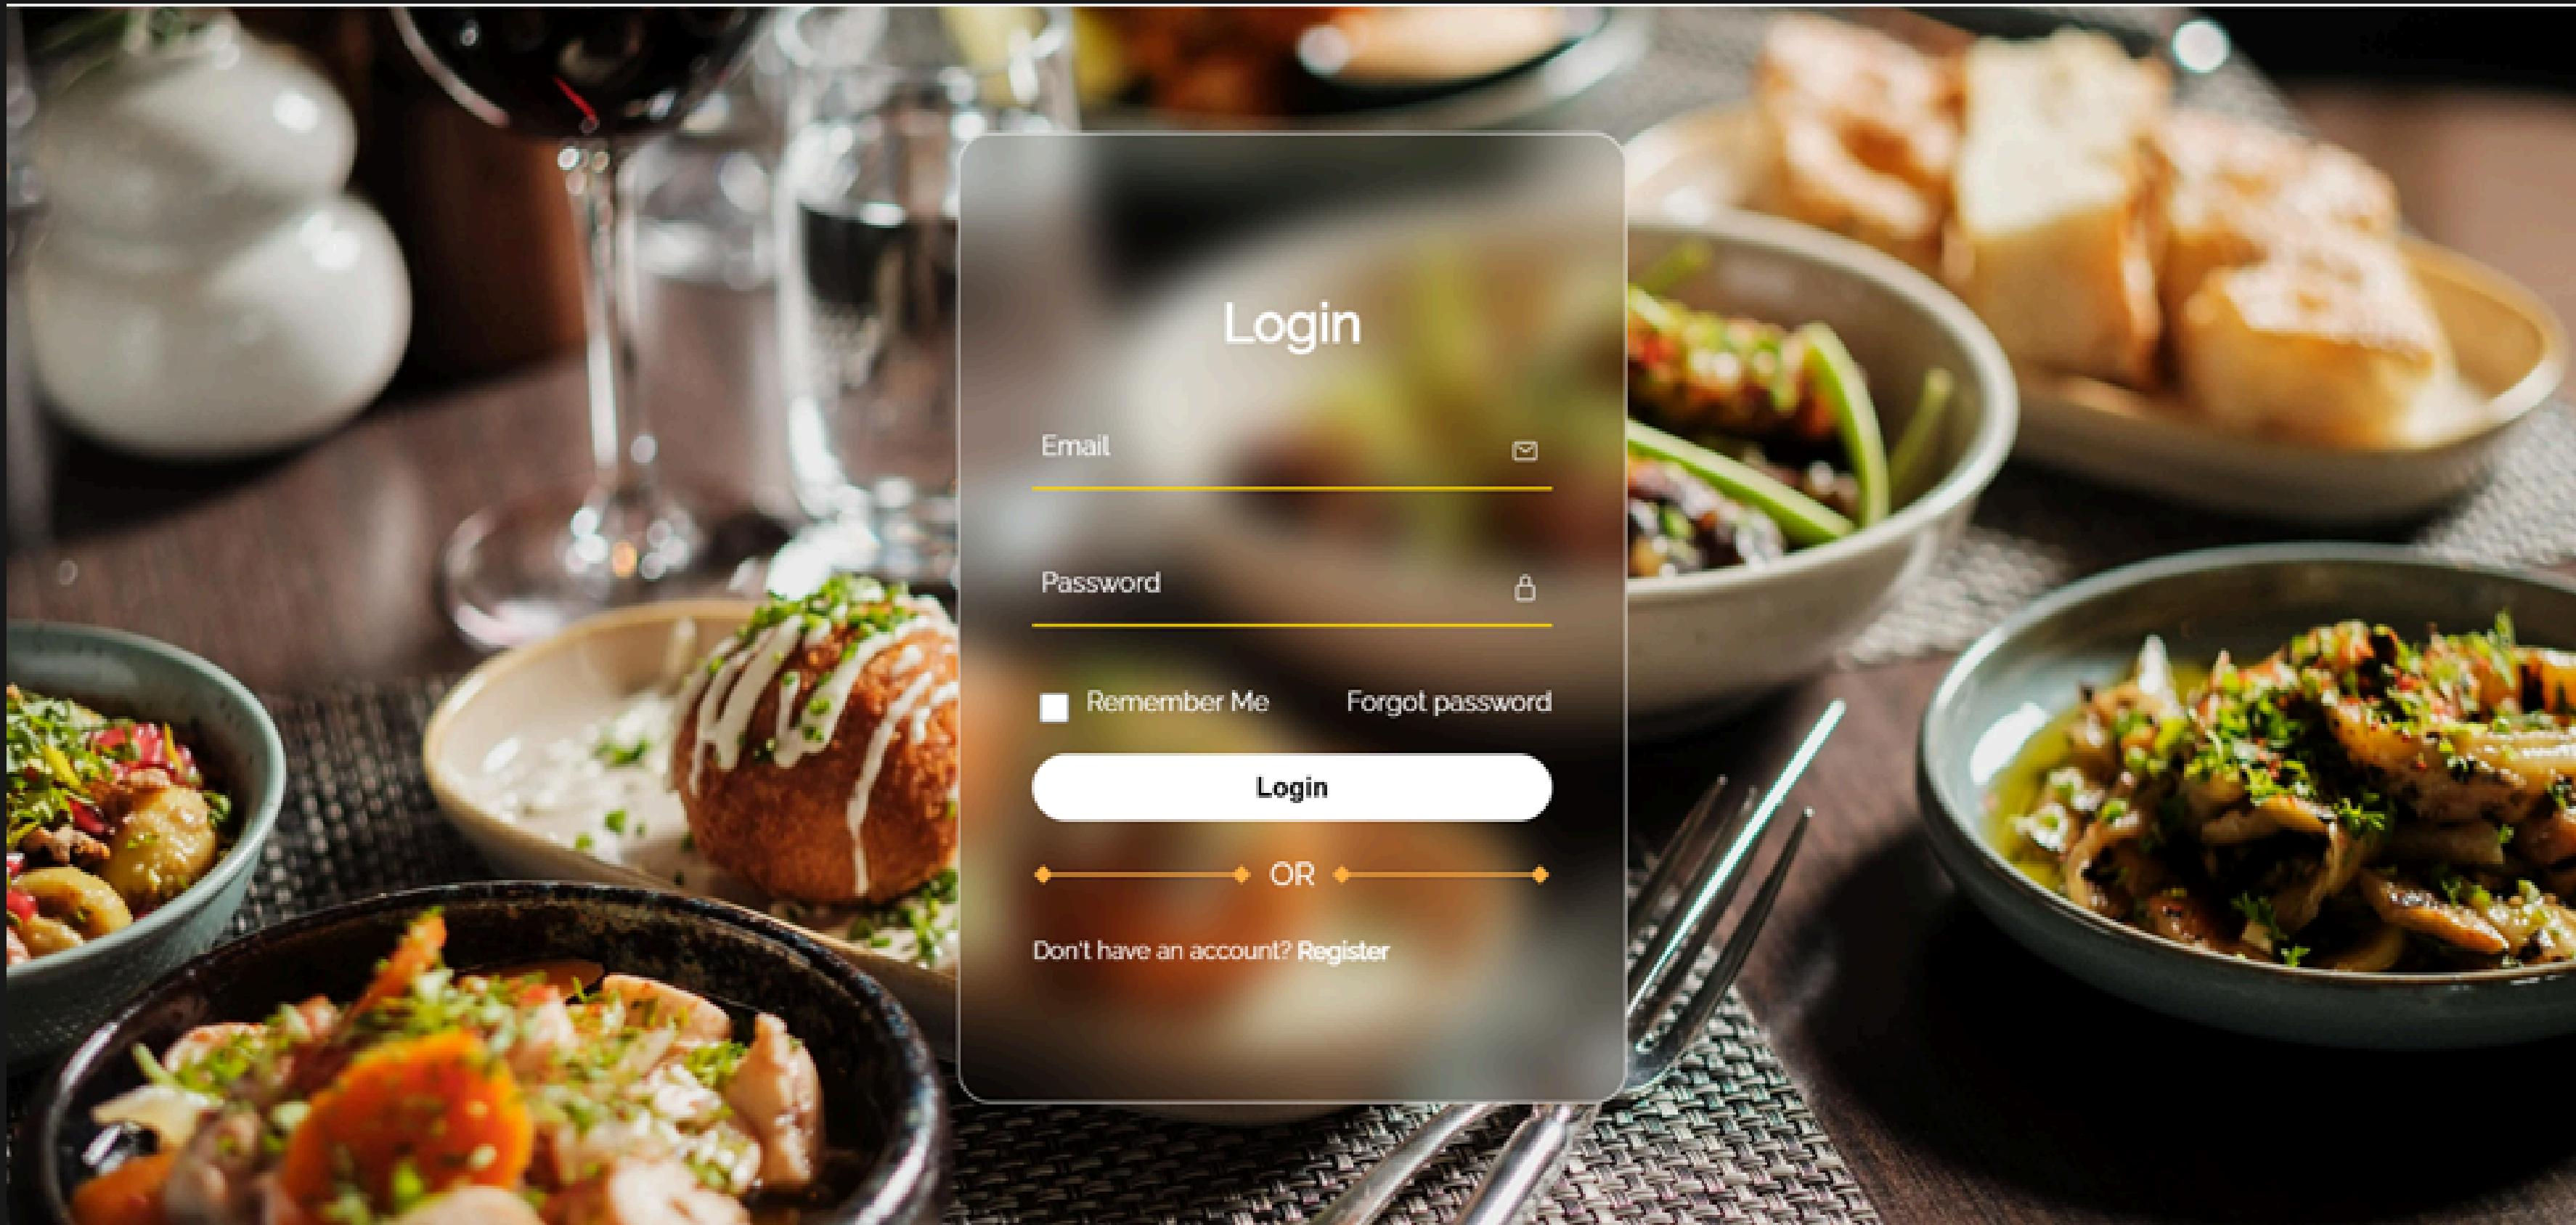

- 01 Simple navigation for customers
- 02 Responsive design for mobile and desktop
- 03 Accessibility for diverse user needs

# Build with Modern Tools

- 01 • Frontend: React, Html, Css, JS
- 02 • Backend: Node.js
- 03 • Database: MySQL

## Every Fla'vor is a Story

After years of working as a chef, Tuan decided to open his own restaurant, inspired by his grandmother's recipes. He spent months perfecting the menu, finding local suppliers, and securing the necessary permits. With his savings, he rented a small, cozy space in town and carefully designed the dining area to feel like home.

# Menu Page

SPECIAL SELECTION

## Delicious Menu

**French Onion Soup** — \$25.50

A rich, flavorful broth of caramelized onions and beef stock, topped with a crispy baguette slice and melted Gruyere cheese.

**Wagyu Beef Tartare** — \$30.00

Finely-chopped Wagyu beef, served with quail egg, Dijon mustard, capers, and crispy beetroot.

**Truffle Risotto** — \$25.00

Creamy Arborio rice cooked with white wine, Parmesan, and finished with shaved black truffle.

**Lobster Bisque** — \$40.00

Creamy and indulgent, featuring lobster meat, a hint of sherry, and fragrant herbs.

**Seared Scallops** — \$39.00

Perfectly seared scallops on a bed of cauliflower puree, drizzled with a truffle vinaigrette.

**Duck à l'Orange** — \$65.00

Smoked duck breast glazed with a citrus-infused sauce, served with wild rice and braised fennel.

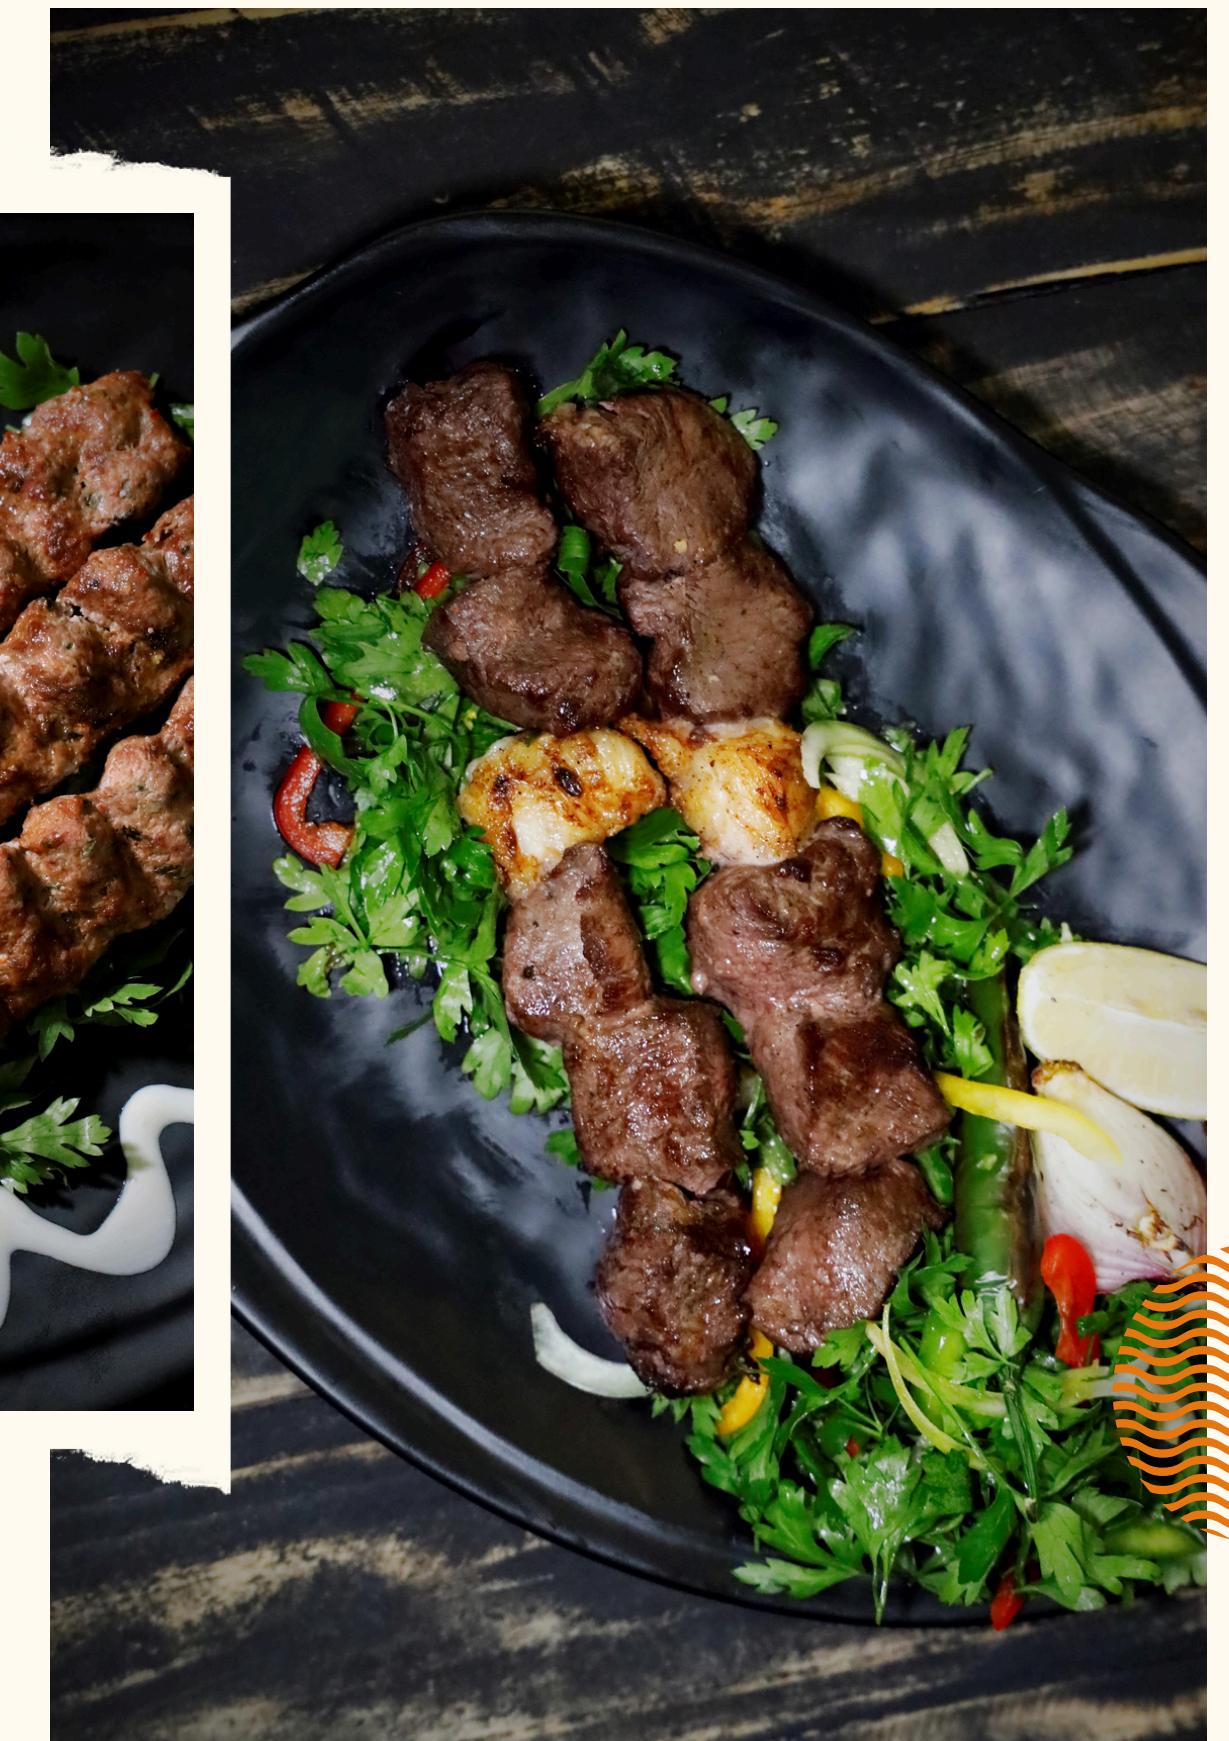

# Future Development

01 Implement Chat AI for customer service

02 Loyalty Program Integration  
( Point and Reward )

03 Multi-Language Support

# Conclusion

**Our team has gained valuable insights and hands-on experience**

- Technical Skills: We enhanced our understanding of full-stack development by integrating front-end frameworks, back-end logic, and database management
- Team Collaboration: Working as a team taught us the importance of clear communication, task delegation, and consistent updates to achieve our shared goals.
- Practical Application: This project allowed us to see how theoretical concepts apply to real-world scenarios, especially in handling customer-focused functionalities.
